# **DETAILED ACTION**

## Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Abel et al. (US 4,713,132).
  - With respect to claim 1, Abel discloses a rotary sealing unit that meets all of applicant's claimed subject matter; in particular, the rotary sealing unit of Abel comprises: an ultrasonic horn rotor (A) and an anvil rotor (1), wherein the ultrasonic horn rotor comprises a sealing head (20) and a coaxial ultrasonic converter (24). Note that the claimed rotary unit being for ultrasound sealing a continuous tubular strip housing an orderly succession of products recited in the preamble is an intended use and is not patentably distinguish the claimed rotary unit from the applied prior art; furthermore, the rotary sealing unit of Abel is fully capable of sealing a continuous tubular strip housing an orderly succession of products.

## Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
  - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 1 and 9 are rejected under 35 U.S.C. 103(a) as being unpatentable over Capodieci (US 6,574,944) in view of Ninomiya et al. (WO 02/078935).
  - With respect to claim 1, Capodieci discloses a rotary sealing unit (300) comprising an ultrasonic horn rotor (310) and an anvil rotor (320), wherein the ultrasonic horn rotor include a sealing head (315) cooperating with an anvil (322) of the anvil rotor. The rotary sealing unit of Capodieci meets all of applicant's claimed subject matter but lacks the specific teaching of the sealing head comprising an actuating device coaxial with an axis of the sealing head.

    Ninomiya teaches a rotary sealing unit comprising an ultrasonic horn rotor (5) having evenly spaced sealing heads (8) and respective coaxial ultrasonic generators (7) such that each of the sealing heads is generated individually when needed. Therefore, it would have been obvious to a skilled person in the art, at the time of the invention, to have modified the rotary sealing unit of Capodieci by having provided a coaxial ultrasonic generator to each of the sealing head, as taught by Ninomiya, so that each of the sealing heads can be generated individually as needed.

Application/Control Number: 10/563,139 Page 4

Art Unit: 3721

• With respect to claim 9, the anvil in the modified rotary sealing unit of Capodieci would include a blade (1230) for concurrently cutting a strip of tubular packaging material (113) while ultrasonically sealing the tubular packaging material.

#### Allowable Subject Matter

5. Claims 2-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure has been cited on form PTO-892 along with the applied references.
- 7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Louis K. Huynh whose telephone number is 571-272-4462. The examiner can normally be reached on M-F from 8:00AM to 3:00PM.
- 8. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Rinaldi I. Rada can be reached on 571-272-4467. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
